

MobismaME-P mobile phone software client

mobisma Wireless Mobility Solution for Panasonic - is a mobile client software that integrates with the Panasonic business communication platforms allowing companies with employees that are always on the move - to:

- Manage and lower business communication costs,
- Enhance customer service, and
- Increase business productivity and revenue.

Customers are increasingly driving the need for improved service and productivity. Wireless Mobility and availability are key business issues for companies in today's business environment. To satisfy the growing customer expectations of enhanced services and support the requirements of a dynamic and mobile work force for anytime anywhere business communications - companies need a managed wireless mobility solution that helps them keep (a) Cost of mobile employee business communications in check – as well as (b) Make sure that employees are virtually always available to take customer calls to improve customer service.

Tightly integrated with Panasonic communication platforms like the IP enabled TDE or NCP platforms, the mobismaME-P wireless mobility solution allows businesses to have an excellent solution to improve productivity and availability of their mobile work force as well as reduce the total communication costs.

The mobismaME-P mobile phone client communicates back with the company business telephony platforms using tones over voice channel - providing a simple yet powerful solution to making mobile phones a true mobile extension of the office communication platform. Users get empowered with the mobismaME-P software client – increasing their flexibility and productivity.

The mobismaME-P application has an intuitive GUI (Graphical User Interface) – allowing users to use their mobile phones as their office phone extension. The following key features are available:

- Call: Make and receive calls from your mobile phone – as if dialing from your desk phone.
- Dialed Calls: Call log showing the last 25 calls you have made.
- Call extension: Easily dial abbreviated office extension numbers.
- Set Presence: Set and change you presence status.
- Call forward: Set and change your call forwardings.
- VoiceMail: Check and listen to your VoiceMail messages.
- Groups: Log in or log out of one or all of your ICD groups as defined in the PBX.
- Transfer Call: Transfer a call to a work colleague back in the office.*

Note: Call Transfer is a PBX function and the user simply needs to dial “#” + Office Extension number to transfer the call.

Mobile Phone Platform - Software Specification

For platform independence - mobismaME-P software is developed as a Java application using Java2 Micro edition, J2ME. J2ME is a Java edition specifically designed for portable handheld devices like mobile phones, PDAs, etc.

mobismaME-P will work with most mobile phones (see recommended phone list) – as long as the mobile phone device supports JAVA and MIDP 2.0 and CLDC 1.0.
